The first and only series in Ukraine based on the Pocket Spring S1000 with increased orthopedics and anatomic effect. It withstands static and dynamic loads up to 150 kg, without creating the effect of 'firm surface'. The applied support technologies: air mesh all around the sides of the mattress, multilayered quilting, a reinforced encasement "Contour 360", soft felt, and also eco-friendly solvent free adhesive "Hot Melt" make this series innovative and unique for Ukrainian market.

Products of the series Come-For provides practicality and comfort required for every home. The product line offers classic springless and spring mattresses with Bonnel and Pocket Spring blocks, ergonomic pillows, knitted sheets, modern beds and stylish bedside cabinets. Come-For series has capsule range of products, each with high function and diversity between models. The consistent high quality of which attracts customers. In this line you will find everything needed to set up the whole room just in a few minutes.

"Extra" mattresses are designed especially for firm sleepers with high requirements of support and maximum load. All products of the line can withstand up to 160 kg per berth. The range of the series is represented by spring models with a strengthened block "Pocket Spring Extra" and a foam model with 5 zones of firmness and unique 160 kg load as well. All models are covered with air mesh around the perimeter for better air permeability. Series Extra includes firm and extra-firm mattresses with a 5 years warranty.

Dynasty is a series of mattresses with a premium design and absolute quality. Their base is a seven-zone spring block Pocket Spring Sky 7 with high premium springs, which ensures the correct back position regardless of how you sleep. Together with classic style topper with comfort layers, these are some of the highest classic look mattresses in our catalogue. Unique combinations of covering layers create the desired firmness and muscle relaxation. All layers are connected by solvent free technology Hot Melt and multi-layered stitches. High quality construction and a Reinforced encasement "Contour 360" allowed us to increase the warranty of the series Dynasty up to 5 years.

One-sided mattresses of the series Active are created taking into account the needs of people leading an active way of life. Enlarged covering layers improve the anatomical properties of the product. The reinforced block Pocket Spring Mono (in a spring model) and a combination of Soft Foam and Mono Foam (in a springless model) will take care of sufficient back support. Mattresses of the series Active have impressive durability and reliability thanks to a special Reinforced encasement "Contour 360". By choosing "Active" you get a product with a long initial comfort and a 3-year warranty.

"Infinity" foam mattresses combine basic comfort, practicality and laconic design. The height of the products is 16 - 18 cm, and the base is a layer of Mono Foam. Additional layers of coconut coir or Visco Memory provide the required level of firmness. The ticking is made of durable, pleasant to the touch tricot fabric. The covering layers are connected by solvent free technology Hot Melt with the usage of nontoxic glue. Infinity mattresses have a 30 month of warranty.

The main issue of Regeneration mattresses is to restore physical strength and emotional balance. Premium materials are used for production: natural latex, unique Memory Gel, modern foams Spring Foam, Soft Foam and Orto Foam. The base of spring models is block Pocket Spring Sky 7 with seven zones of firmness and premium high coils. All mattresses of this series are turn-free, their construction is securely fixed with a Reinforced encasement "Contour 360 ". Biorythmic application tricot fabric used for the ticking is enriched with mineral molecules, which helps to relieve stress. The warranty period is 5 years.

The series of mattresses based on a new material Thermoflex. A special structure made of cotton with high air and moisture conductivity creates an optimal orthopedic and anatomical effect of a berth for most people. Thermoflex combines high density with elasticity and resilience, which provides you daily comfort during sleep. The series has an increased warranty of 3 years.

Smart Kids series of mattresses and home textiles will help you set up a children's bedroom with high quality and safety. The products will provide comfort for children from birth to 16 years. The line includes mattresses based on Light foam, as well as pillows, the shape of which is designed taking into account children's physiology. The products of Smart Kids have an approved safe composition for a child's body and an attractive bright design. Special tricot fabric with technology Q-dry is not only pleasant to the touch, but also thanks to its multi-layered structure, it dries quickly and allows air and moisture to effectively pass through.

Notte has a capsule range of affordable mattresses. Here you can find products with a classic spring block Bonnel, an independent springs Pocket Spring with three zones of firmness, as well as classic springless mattresses. The line is designed to keep high standard level of basic sleeping phase, providing same assembling level, quality control and product design level as higher class models. The confidence in quality of these products is achieved due to the load from 90 to 120 kg per berth and an increased warranty up to 30 month.

HEVEA

Mattresses bring the best feeling of orthopedic and anatomical comfort. The natural perforated latex, which is a part of a mattress, is more durable than polyurethane and other covering layers. The natural composition of latex prevents the growth of fungi, viruses, mold, and dust mites. The combination of latex and all technologies makes this mattress series the best in the whole **Aloe Vera** line.

VERDA

Double-sided mattress is built according to an optimal for this spring block scheme – by combination two foams. It is also equipped with a strengthened Reinforced encasement and fabric with **Aloe Vera** extract that is sewn with covering layers with the use of multilayered stitches. Air mesh prompts free air circulation in the mattress; therefore it prevents accumulation of excess moisture and growth of pathogens.

Technologies eXtra

Designing a block of separate springs eXtra, we aimed not only to provide mattress firmness but also to keep high resource.

The basis of the block is a full sized 7 turns high spring made of carbon steel. Thanks to the increased by 20% weight, length and high-temperature hardening, the spring is capable to maintain long high loadings without deformation. The stiffness of the whole block of separated springs is achieved due to their pre-compression by 50% - before putting in the separated bags. The high back resistance of compressed springs gives to a basis of a mattress necessary firmness and provides point support of a spine. Thus, the formula of the rigid spring block eXtra is simple and reliable: more steel, harder hardening, and higher resource.

Technologies BioRythmic

The human body is an amazing mechanism, the possibilities of which are still not fully explored. Nature gave us perfect health at birth but unfortunately, a modern person lives in aggressive environment. Drowsiness, tension, fatigue and emotionl burnout are the most obvious signs of disruption of internal bioprocess. Only those who have managed to develop the strength of the body and powerful biocommunications can boast of better health, enthusiasm and enjoy their life. Traditionally, people practice yoga, massage, stone therapy to relieve stress and restore strength. We set ourselves the goal of enhancing the restorative properties of sleep.

The mattress on a high spring block SKY 7. Memory Gel is the main layer of comfort. It is a hybrid of Visco Memory and TechnoGel and combines their best properties. This mattress perfectly follows contours of the body, evenly allocates pressure, and provides active thermoregulation.

The result of our work is a new series of mattresses with BioRythmic technology. This technology has made it possible to attach to the fiber structure molecules of natural minerals, which are known to have a positive effect on human bioprocesses.

Molecules of limonite, ionized silicon, magnesium and calcium generate energy vibrations that best affect the biocommunication channels of our body. Mineral therapy works during sleep, accelerating the release of the body from internal stress, normalizing biorhythms and increasing stress resistance. The results of tests performed by specialists of the Hohenstein Institut für Textilinnovation GmbH show that short-term rest on the BioRythmic mattress reduces sensitivity to stress by 17% and increases the ability to control your body by 70%.

Rest on the mattress with technology BioRythmic:

Reduces the level of existing stress, increases stressors resistance.

Improves overall tonus.

Decreases «effect of severe awakening».

Stars the body's recovery processes.

Increases focus and self-control.

about mattress

Thermoflex was chosen as the main material of the series.

Thermoflex is a new, environmentally friendly, non-woven material. It contains natural and regenerated cotton fibers, which are connected by temperature and pressure. The fibrous structure is well permeable to air, and also perfectly absorbs and removes moisture, creating an atmosphere of warmth and comfort in bed.
